<b>Affected QGIS version:</b>	2.2.0	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No

<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 18480
<b>Description</b>		
<p>I have a model with more than 2 shape layers to merge.</p> <p>Normally the SAGA function works fine for that, but within the modeler, it does not seem to use the list of added layers for merging, but simply returns the first layer.</p> <p>Workaround for now is to make a chain of ftools merge shape layers functions for the products of the previous merges, which is quite inconvenient.</p> <p>QGIS 2.2 32b , OSGEO4W advanced install, Win7 64bit.</p>
