

QGIS Application - Bug report #9993

Datum transformation selection overview not informative

2014-04-03 08:40 AM - Robert Nuske

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Projection Support	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18485
Description		
<p>Selecting a datum transformation is difficult with the information currently provided in the pop-up dialog. At the moment only some weird numbers (coefficients for src and target transform) are shown. Some target transforms (e.g. ETRS89) are even blank (see attached image datum_transformation_popup.png).</p> <p>Its almost impossible for an uninitiated user to pick a transform.</p> <p>Valuable information, such as Source and Target CRS, Remarks and Scope from the EPSG database, are hidden in a mouseover popup. It would be a substantial improvement if this information would be promoted and displayed in the main datum transformation selection dialog.</p>
